

Health & Wellness

We are associated with Health and Wellness Industry since last two decades and have worked extensively in these sectors developing new products as well as offering Consultation to both domestic and international companies.

We are pioneers in developing indigenous products preferably from natural resources using latest and state-of-the-art technology. Some of them are Plant-based Stem Cells Products, Omega-369 EFAs Formulations and Mineral Supplements procured from Deep Sea.

Our forte is in developing unique products using Plant Cells Tissue-Culture methods. We are in the early stages of product development related to AIDS, Cancer, Rheumatoid Arthritis, TB and other life-threatening conditions.

We are open to associate with Business Enterprises for Manufacturing/Marketing Tie-up as well as outright sales of one or all of these products.

Currently, we have developed a Natural Formulation for Covid-19 Infection and we are expecting Clinical trials results of this Product very soon.
