

# Rheumatoid arthritis

**Arthritis** is a general term that describes Inflammation and/or a wearing away of the joints.

**Rheumatoid arthritis** is a form of arthritis in which the membranes or tissues lining the joints become inflamed (synovitis). Joint inflammation causes swelling and pain and, over time, may destroy the joint tissues and lead to disability. Rheumatoid arthritis affects the hands, wrists, elbows, feet, ankles, knees, or neck. It usually affects both sides of the body at the same time. The abnormal immune response results in ongoing Inflammation of the tissues lining the Joint, a breakdown of cartilage and loosening of the ligaments and tendons supporting the joint. Ongoing inflammation also causes the membrane lining of the joint (synovium) to grow into a thick, abnormal tissue called pannus. These processes result in destruction of the cartilage, underlying bone surrounding the joint, ligaments, and tendons, and eventually lead to deformed joints.

## Benefit of SGS Therapy:

- Removes swellings, pain inflammation & also stiffness from affected joints.
- Make an effective and healthy ligament; cartilage & synovial fluid with high quality membrane to restore the smooth functioning of joints.
- Provides ideal nourishment to joints.
- Ensures very healthy bone density.
- Maintain the required Immunity & Immune response for all affected joints.

## Suggested Products:

**Grolyfe** : 7 drops 3 time under the tongue

**Comraid**: 1 capsule 3 times after meal

## SH&WK:

**OmegaSat**: 1 soft gel 2 Times after meal

**Minerjal**: 7 drops 4 times in 200 ml drinking water

**Alprox**: 1 tab 3 times after meal
